SUMMARY

Experienced UI Developer with over 10 years of expertise in UI development and graphic design. Proven track record in delivering high-quality web solutions, adhering to accessibility standards, and collaborating effectively in Agile environments. Strong communicator with proficiency in HTML5, CSS3, JavaScript, and Angular.

TECHNICAL SKILLS

- HTML5, CSS3, JavaScript, TypeScript, Angular
- Accessibility (WCAG 2.0), W3C Standards Compliant, Responsive Design

WORK EXPERIENCE

UI Developer, BMO Financial

September 2018 – Present

- Led UI development for BMO Nesbitt Burns redesign project using Agile methodology, ensuring alignment with project goals and timely delivery.
- Collaborated with Visual Designers, Front-End, and Back-End Developers to deliver cohesive solutions.
- Ensured adherence to BMO Design System guidelines through effective communication with the Design System team.
- Remediated accessibility defects and developed new accessible web pages for BMO InvestorLine redesign.
- Utilized HTML5, CSS3, JavaScript, and Angular framework for UI development.
- Contributed to the evolution of the BMO Design System, enhancing component libraries and guidelines to improve overall consistency and usability across projects.
- Secured second place in the BMO Innov8 Hackathon 2024, demonstrating innovative problem-solving and teamwork.

UI Developer/Website Developer, WorkAround Software Inc.

July 2012 – August 2018

- Developed and designed the EHRflow Electronic Health Records software, focusing on front-end design and compliance with relevant regulations.
- Redesigned and maintained project websites (ehrflow.ca, midwifery.ehrflow.ca, psychotherapy.ehrflow.ca) to meet industry standards and AODA requirements.
- Conducted usability reviews, optimized site performance, and analyzed site traffic using Google Analytics.
- Redesigned and managed WorkAround Software website, including ongoing content updates and performance monitoring.
- Built several small business sites from concept to completion.

Web Developer, Tech Data Canada

December 2010 – April 2012

- Designed, developed, and maintained the company website and intranet, liaising with marketing and IT departments.
- Managed and improved various promotional websites and microsites for Tech Data programs and events.
- Updated content and built new web pages to support corporate initiatives.
